

# Orange Basket

Fun to make, easy to do and pretty to look at.

Cut a thin slice from the bottom of the orange to make a flat resting surface.

Use a zester or the eye opening of a food decorator to cut strips from the skin of the orange.

Start at the top and cut strips down towards the flat surface.

Stop before you reach the bottom. Go all the way around the orange.

Cut away two wedges at the top of the orange.

Remove the pulp so you are left with a handle in the middle.

Fold over the strips to make loops. Remove the pulp from the orange and fill with cranberry sauce, apple sauce or fruit.
